

# Join the Yue Lab at UCSF!

Positions available: Postdoctoral Fellows

## About Our Research:

- **Interest:** Explore interactions between neural tissues and bodily fluids near the brain's ventricles.
- **Approach:** Genetics, electrophysiology, imaging, and pharmacology in mouse models; biochemistry and cell culture.
- **Goal:** Uncover how brain-fluid interfaces influence neurological health and disease.

PhD: Johns Hopkins, King-Wai Yau's Lab  
Postdoc: UCSF, David Julius' Lab  
Awards: Hanna H. Gray Fellowship (HHMI),  
Croucher Foundation Postdoctoral Fellowship

## Job Requirements

1. PhD in a related field.
2. At least one first-author publication during PhD.
3. Demonstrated passion and dedication to research.
4. Experience in brain slice electrophysiology, imaging, preferred.

## Apply with:

- A CV with contact info of at least 3 referees.
- A summary ( $\leq 2$  pages) of your research interests and achievements.
